Detailed explanation: I'm 31 tokens in debt... I just logged on and -46 was my balance, then I did a minigame and now -31 is my balance. I thought debt was something I'd have to worry about as an adult, not a teenager :/. It might be because I bought some Rainwing wings before I had closed the app last, and those tokens were ones I had kind of glitched out of an audio exerpt? I'm not sure, though.

Just two things. First is that those games that pop up in the grey box like the 'dragonet' and others, when I press the play button it doesn't work and won't play. Also, my computer won't let me listen or read book exerts.

Just a side note, not actually a problem, I hear a lot of things about 'the scavenger hunt' but I can't find it. Thanks in advance!

Detailed explanation: In the scavenger hunt mini game the hit boxes for your own gems are a bit big. (Like to big) I hit my self from like a whole gem away from my trail. then when i respawned i picked up three gems and BOOM dead again (I was the only one in the game if you were interested). so to fix it could you make the hit boxes smaller.

Detailed explanation: I've noticed that the goosebumps game is the only thing that's been giving me tokens. I managed to get a silver metal in Kinkajou's fruit game, but when i looked over, the amount of tokens I had hadn't changed at all. I'd also played the free slide thing. I believe I'd won 2 xp, a pair of shoes, and about 136 tokens, but according to my profile thing in the corner, my tokens still hadn't changed at all. I had also completed all 10 of the code break games in the Clue Hunt in the little 39 clues thing and I'm not sure if it gives tokens, but if it does, I never got any.

Update!

On web, the Camouflage Challenge and Bone games have been fixed.

The negative money bug is a new one we hadn't seen before :o Games shouldn't make you stressed about financial matters! Are you able to get out of debt if you play some games and make more tokens? Or do you get stuck with a negative token amount?

@Amber, you can't play using the mobile web browser on your phone. But! Now the app is available on both iOS and Android so you can download that! :)

Thanks again for all your bug reports and suggestions! We're working on our next big update to add some stuff, fix some stuff, and make the game better n better.

I have an idea. Could we buy a potion in the store that turns our avatar into a WoF dragon for, say, 12 or 24 hours? They wouldn't have to be as huge as th dragons on WoFI, but I think it would be cool, if it's even

Mobile App Version

Detailed explanation: Sometimes when I fly for a different map, most often going to WOF from The Hub, the carpet goes ahead of me and then I fly after it as though I was sitting on it.

~~~

I was playing the minigame Bone: Treasure Hunt and I was on my last life. When I wanted to end the game by being attacked by a rat beast, it didn't work. The beast still jumped at me, but I couldn't die. I tried several more times and it still didn't work.

~~~

I went to play Invasion of the Birdy Snappers, but when it sent in the first wave of five chickens, I couldn't see any of them. I could, however, see the second wave of chickens. I played it again later, and I could see all of the chickens

~~~

When I replay Kinkajou's Fruit Find, it tells me what about of seconds it takes to get each medal, then it says "play again?", and then it shows the time frame in which to earn each medal again. Also, when I replay, sometimes there's just a few fruit that go invisible, and sometimes fruits have little squares in the middle.

~~~

I played Slappy's Drop Dead House, but sometimes when I try to change directions at the end of one side, it doesn't work and my character just keeps running into the wall.

~~~

When I first played, I got some tokens, I believe around 120 or so, and then left before playing again. When I came back, I had -120, and I slowly earned my way back into the positives.

~~~

While on the WOFMB island, there was a scavenger hunt. I played, but I, along with one other person, was not able to fully enter the game until twenty seconds before it was supposed to end. While I was waiting, I was able to walk around the islands as if I was in the game. I mean I was in the same downward view as if I was playing, and in the corner was the gem counter.

~~~

I tried waving, but it wouldn't stop letting me wave or do any other action, as in dance, cheer, clap, etc., at someone/with someone until after he had left the island. This was after the failed Scavenger Hunt.

~~~

I tried playing the daily, 39 Clues Challenge yesterday, but when I tried playing today, it brought right back to the quiz to find what branch I'm in, and then it takes me to training. Was it because I skipped training? I just couldn't beat the last challenge with that robot.

~~~

I'm not sure if this counts as a but or not, but J played Alpha Blitz a couple times and I got stuck because there weren't any more vowels. Well, there was a y, but I couldn't do anything with it.

~~~

When I'm on the slide or on the flying bookmark in the RainWing onesie, the tails sticks through it. It's actually kinda funny XD.

Recommendations:

Maybe add bowties as a clothing option? XD I love bowties, and I think they would look really cool with the suspenders and the Newsboy Blazer. Maybe some headbands too?

Complaints:

It kind of bugs me that if I want to wear a hat or crown {not the RainWing or NightWing head} that it changes the hairstyle as well.

~~~

It can get pretty hard to read usernames due to the color. Is it possible to make the usernames look more like the ones in the SA game?

I found it in the filter, so even though it's not here in the thread yet we have it for our QA. Thanks for giving such an extensive report. It's a really major bug that we hadn't seen before and I'm really sorry it happened to you.

Some more questions:

- Do you remember how many times you played Word Wrangle in a row both times it happened to you?
- Were you logged into both iOS and web at the same time (i.e. had it open in a tab on web while playing on mobile) either time?

To make sure I've got exactly what happened right:

1. you were playing Word Wrangle
2. got the freeze bug
3. refreshed the page/hard quit the iOS app
4. on restarting, you were back at the avatar customizer and you got the "we can't find your wardrobe" message
5. you refreshed again/hard quit the iOS app again
6. came back into the game to find your account wiped

Are all those steps right? We've been trying to reproduce it, though I can't even get the Word Wrangle freezing bug to trigger >:( Come on game, break for me!

I don't remember how many times I played. To me, I feel like it triggers when I hit the replay button too fast. It doesn't have a set amount. I might get through ten rounds without it freezing and sometimes it happens the first time. I didn't have it open on another device either time. And yes, that's what happened

This is the second time this has happened to me, once on mobile and once on Chrome.

The Word Wrangle game will occasionally freeze, so I reload the page or reboot the app.

On mobile(I can get you the specifics tomorrow but from what I remember my phone is iOS 12.1.2 and the app version is 1.0.4): I completely quit out the of app and went back in. When I hit Play (to spawn into the Hub), it gave me the "we can't find your wardrobe, tell us what you look like" menu. I quit out and went back in again and this time it spawned me into the Hub. However, all my levels and achievements had reset. I was almost level 26. My inventory was fine, as were my tokens.

On web: This was the second time it happened. I was playing word wrangler again, and the leaderboard gave an error message and when I tried to hit replay, it froze. The rest of it is the same, however when I logged back in after the wardrobe message, it showed me the menu again. I'm going to go through the menu and see what happens.

I find this immesely frustrating. i was almost level 26 and was at level 17 when it happened the second time. I also just bought every single item in the store yesterday and I would hate to lose it :(
